Office Memorandum • UNITED STATES GOVERNMENT

TO : Chief, Intelligence School

FROM : Chief, Intelligence Production Faculty

DATE: 25 October 1960

SUBJECT: Weekly Activities Report No. 38
19 - 25 October 1960

I. SIGNIFICANT ITEMS

Nothing to report.

II. OTHER ACTIVITIES

25X1A

1. Mr. [REDACTED] was contacted by [REDACTED] from PIC in regard to the Student Exchange Program with the Soviet Union. It is felt that the present selection of exchange students to do graduate work at Soviet Universities concentrates too heavily on students of Political Science, History, and Sociology. It is believed that more value could be obtained from this Program if students were selected to do research in the particular scientific fields about which we lack information on the state of Soviet knowledge, techniques, and current research. Examples of such fields are that of Photogrammetry, Optics, Geodetic Control and mapping. Mr. [REDACTED] is inquiring into the Agency interest in this matter.

25X1A9A

2. Conference Techniques No. 15 began on 24 October with 16 students enrolled -- this enrollment is 4 students over the ceiling [REDACTED] prefers. However, he agreed to instruct this large number of students since it is necessary that some of the students be enrolled in this course; because of office pressure and future assignments, they cannot take the course at a later time.

The classroom [REDACTED] prefers to use for his Conference Techniques Course -- 2251A R&S -- is not large enough for a class of this size; however, we could not obtain a larger one as the other classrooms over Graphics and 2025 and 2027 are all being used for other courses.
